Section 5 - SUPPLEMENTAL SERVICES

5.1 OPTIONAL CALLING SERVICE

[D]

5.1.1 General

The features in this section are made available monthly, by subscription, on an individual basis or as part of multiple-feature packages. All features are provided subject to availability; features may not be available with all classes of service.

5.1.2 Description of Features

a. 3-Way Calling

3-Way Calling allows a customer to add a third party to an existing call and form a three-way call.

b. 6-Way Calling

6-Way Calling allows a subscriber to call up to five other numbers to create a 6-way conference call.

c. Call Forwarding

Call Forwarding features, when activated, redirect attempted terminating calls to another customer-specified line.

The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.

Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.1 OPTIONAL CALLING SERVICE (Cont'd)

5.1.2 Description of Features (Cont'd)

c. Call Forwarding (Cont'd)

Call Forwarding - Busy automatically reroutes an incoming call to a customer predesignated number when the called number is busy. The feature is always activated on the subscriber's line. A service order is required to change the forward-to number.

Call Forwarding - Don't Answer automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within a fixed period. The feature is always activated on the subscriber's line. A service order is required to change the forward-to number.

Call Forwarding - Variable allows the customer to choose to reroute incoming calls to another specified telephone number. The customer activates and deactivates this feature, and selects the forward-to number for each activation.

Remote Access to Call Forwarding Variable allows the subscriber to activate and deactivate Call Forwarding Variable from a telephone other than the one to which Call Forwarding Variable is assigned. A pre-assigned PIN provides the subscriber with security for activating and deactivating the feature.

Call Forwarding Fixed automatically re-routes an incoming call to a pre-designated number when Call Forwarding is activated by the user.

d. Call Waiting/Cancel Call Waiting

Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.1 OPTIONAL CALLING SERVICE (Cont'd)

[D]

5.1.2 Description of Features (Cont'd)

e. Call Waiting Originating

Call Waiting Originating allows the subscriber to apply call waiting treatment to a busy called line for the duration of the call attempt. Use is restricted to the subscriber's inter-terminal group.

f. Distinctive Ringing

This feature enables a user to determine the source of an incoming call from a distinctive ring.

g. Multi-line Hunting

Hunt Group

Hunting is used to search for an idle line within a pre-defined multi-line hunt group. Each line in the multi-line hunt group is assigned a member number used for hunting.

Regular (sequential) Hunting searches for an idle line beginning with the dialed member and continuing by increasing member number to the highest member number. If no idle line is found, a busy signal is returned.

Circular Hunting searches for an idle line beginning with the dialed member and continuing by increasing member number to the highest member number. If no idle line is found, hunting continues from lowest member number up to the member before the dialed number. If no idle line is found, a busy signal is returned.

Uniform Call Distribution Hunting searches for an idle line beginning with the member with the fewest number of completed calls and continuing with the member with the next higher number of completed calls. When two or more members have the same number of completed calls, the hunt is conducted from the lowest to the highest member number. If no idle line is found by the end of the hunting sequence, a busy signal is returned.

5.1 OPTIONAL CALLING SERVICES (Cont'd)

5.1.2 Description of Features (Cont'd)

g. Multi-Line Hunting (Cont'd)

Series Completion Hunting (circular arrangement) This feature functions like Circular Hunting, but defines the hunted numbers with a list of up to 16 linked telephone numbers, instead of with a multi-line hunt group. Hunting starts with the called line and, if not idle line is found, ends with the line before the called line.

Queuing for Multi-Line Hunt Groups with Delay Announcements When all members of a multi-line hunt group are busy, incoming calls are queued on a first-in, first-served basis. The calling party is given delay (queuing) treatment consisting of tones and/or customer-provided announcements or music. Queuing for Multi-Line Hunt groups applies only to Circular Hunting and Uniform Call Distribution. It cannot be used with Regular (Sequential) Hunting or with Series Completion Hunting.

h. Speed Calling

Speed Calling allows the subscriber to create and maintain a personal list of hone numbers, each of which can be dialed by entering one or two subscriber-specified digits.

Speed Calling 8 provides for a Speed Calling list of up to eight numbers, each dialed by one digit.

Speed Calling 30 provides for a Speed Calling list of up to 30 numbers, each dialed by two digits.

i. Call Hold

Call Hold allows the subscriber to put an in-progress call on hold, place a second call and conduct a private conversation that the first caller can't hear, disconnect from the second call, then return to the original call.

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all Advanced Custom Calling services. Transmission levels may not be sufficient in all cases.

5.2.2 Description of Features

a. Caller ID Name and Number

b. Automatic Callback

The Automatic Callback feature allows a customer to automatically Callback the last number dialed. This is accomplished by the customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then Callbacks the call for the customer.

The Automatic Callback feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Callback feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically called back and the customer is notified of the connected call via a distinctive ring. [D]

- International Direct Distance Dialed calls

c. Automatic Recall

The Automatic Recall stores the number of the most recent incoming call (including unanswered incoming calls) to a customer's number. This allows a customer to dial back any missed or unanswered telephone calls.

d. Selective Distinctive Alert

Selective Distinctive Alert allows a user to create a list of up to twelve telephone numbers from which calls will be distinguished by a special ring or, if the line is busy, by a special call waiting tone. The number of the last incoming call can be added to the user's list even if it is not known.

When the feature is activated, calls from numbers on the user's Selective Distinctive Alert list have a special ring or special call waiting tone. Calls from numbers not on the list ring normally.

Using codes entered on the user's station set, the user can at any time: add numbers to or delete numbers from the Selective Distinctive Alert list, and activate or deactivate the feature.

e. Selective Call Acceptance/Forwarding

Selective Call Acceptance/Forwarding allows a user to create a list of up to twelve telephone numbers from which calls will be accepted or forwarded to a user-specified number.

When the feature is activated, calls from numbers that are not on the user's Selective Call Acceptance/Forwarding list are either routed to an announcement that calls are not being accepted or forwarded to a user-specified number.

Using codes entered on the user's station set, the user can at any time: add numbers to or delete numbers from the Selective Call Acceptance/Forwarding list; specify or change the forward-to number; specify how non-accepted calls are treated; and activate or deactivate the feature. [D]

Selective Call Rejection allows a user to create a list of up to twelve telephone numbers from which calls will not be accepted. The most recent incoming call can be added to the list even if the number is not known.

When the feature is activated, a call from a number on the user's Selective Call Rejection list is routed directly to an announcement that it will not be accepted. Calls from other numbers complete normally.

Using codes entered on the user's station set, the user can at any time: add numbers to or delete numbers from the Selective Call Rejection list, and activate or deactivate the feature.

g. Caller ID Number Only

Caller ID Number automatically displays a caller's number, if available, on the user's station set display.

h. Caller ID Name Only

Caller ID Name automatically displays a caller's name, if available, on the user's analog station set display.

i. Call Trace

Call Trace enables a user to trace the last incoming call in order to take legal action against the caller. The user traces the call by either entering an activation code or pressing a feature button on the station set immediately after its receipt. The call trace is transmitted over a data link to an authorized law enforcement agency. An announcement informs the user whether the trace was successful. The user can then contact the law enforcement agency to take legal action. The user does not receive the Call Trace information.

Call information is transmitted from the terminating switch to customer-provided equipment at the customer's premises for recording and storage.

k. Computer Access Restriction

Computer Access Restriction allows a user to create a list of up to 31 telephone numbers from which calls will be accepted for computer access dial-up.

When the feature is activated, calls from numbers that are not on the user's Computer Access Restriction list are routed to an announcement that calls are not being accepted or forwarded to a user-specified number. Using codes entered on the user's station set, the user can at any time: add numbers to or delete numbers from the Computer Access Restriction list; specify how non-accepted calls are treated; and activate or deactivate the feature.

l. Anonymous Call Rejection

Anonymous Call Rejection automatically routes incoming calls that are intentionally marked private to an announcement that such calls are not accepted. The user is not alerted to the incoming call. Calls with numbers or names that are unavailable due to network restrictions or other similar reasons complete normally.

The user can activate and deactivate Anonymous Call Rejection with dialed codes.

Anonymous Call Rejection is included with all Caller ID features. Lines without a Caller ID feature can subscribe to Anonymous Call Rejection as an individual feature.
