STORAGE-IN-TRANSIT

- H. When a storage-in-transit shipment has been placed in a carrier's or agent's warehouse, both the carrier and the warehouse must have in their possession records showing the following:
1. An itemized list of the shipment with the Bill of Lading number noted thereon.
 2. Point of origin and destination.
 3. Condition of each article when received at and forwarded from the warehouse.
 4. The dates when all charges, advances or payments were made or received.
 5. Dates shipment was delivered into and forwarded from the warehouse.
- I. During the storage-in-transit period, shipper may withdraw a portion of the property, provided that all accrued charges on the shipment are paid prior to such withdrawal, except as provided in Item 240. When the selection of items requires unstacking and/or restacking of the shipment, charges for such handling shall be assessed in accordance with Item 560. Charges for transportation furnished, if any, for portion selected for delivery shall be assessed on same basis as would apply to that portion as an individual shipment. With reference to the portion of the shipment which remains in the warehouse, shipper may elect in writing to terminate the storage-in-transit service and place the remaining property in storage with the warehouseman in possession, in which event, the warehouse will be considered the destination of the shipment. If the shipper elects to have the remaining portion remain in storage-in-transit, the following will be applicable:
1. Storage-in-transit charges, if any, for the balance of the storage-in-transit period shall be assessed on the same basis as would apply to the remainder of the shipment as an individual shipment.
 2. Charges for transportation furnished, if any, for the delivery of the remainder of the shipment shall be assessed on the same basis as would apply to that portion as an individual shipment.
- J. During the storage-in-transit period, shipper may add property to that already in storage-in-transit. Charges for such property added shall be as follows:
1. Transportation charges to apply on the addition to the storage-in-transit shipment from initial point of pick-up to warehouse will be as provided in paragraph (F).

 3. All subsequent charges including storage-in-transit will be based on the total weight of the combined shipment.
- K. If delivery cannot be made at the address specified on the Bill of Lading because of impracticable operation as defined in Item 290 hereof, and neither shipper, consignor nor owner designates another address at which delivery can be made, carrier will hold the shipment under the storage-in-transit provision of this Item.

NOTE: All rates and charges applicable on shipments subject to storage-in-transit shall be those in effect on the date shipment was loaded at point of origin.

ITEM 440

WEIGHTS – DETERMINATION OF

- A. Nothing in this Item shall be construed as requiring the weighing of shipments, unless the carrier bases its rates and charges on the weight of the shipment.
- B. Each household goods carrier which establishes household goods rates by weight shall determine the tare weight of each vehicle used in the transportation of household goods by having it weighed prior to the transportation of each shipment, without the crew thereon, a certified scale, and when so weighed, the fuel tanks on such vehicle shall be full and the vehicle shall contain all pads, chains, dollies, handtrucks and other equipment needed in the transportation of shipment to be loaded thereon, the tare weight of the vehicle used in a move shall be entered on the Bill of Lading after the vehicle has been loaded. The net weight of the shipment shall be obtained by deducting the tare weight from the gross weight. Where no certified scale is available at the point of origin, the gross weight shall be obtained at the nearest certified scale either in the direction of the movement or in the direction of the next pickup or delivery in the case of part loads. In the transportation of part loads, this paragraph shall apply in all respects, except that the gross weight of a vehicle containing one or more part loads may be used as the tare weight of such vehicle as to part loads subsequently loaded thereon. The consumer of the load, or his representative, upon request of either, shall be permitted without charge to accompany in his own conveyance, the carrier to the weighing station, and to observe the weighing of shipment after loading. The carrier shall use a certified scale which will permit the consumer to observe the weighing of his shipment without causing delay. If no certified scale is available at origin, at any point in route, or at destination, a constructive weight, based on seven pounds per cubic foot of properly loaded van space, may be used.
- C. The carrier shall obtain a weight ticket, with tare and gross weights evidenced by separate tickets, and the driver shall enter thereon the number of the Bill of Lading accompanying the shipment, and a copy shall be retained in the carrier's file. If both the gross and tare weights of a shipment are obtained on the same scale, they may be evidenced on the same weight ticket. A true copy of each weight ticket pertaining to a shipment shall be given to the consumer at the weighing station if the consumer is present or upon delivery of the shipment if the consumer is not present at the weighing. A part load for any one consumer not exceeding one thousand pounds may be weighed on a certified scale prior to being loaded on the vehicle. Additionally, an automobile or other article weighing in excess of five hundred pounds which is mounted on wheels may be weighed separately by obtaining the weight of such article on a certified scale prior to loading on the vehicle to be used for its transportation.
- D. No common carrier shall accept a shipment of household goods for transportation which appears to be subject to the minimum weight provisions of the carrier's tariff without first having advised the consumer of such minimum weight provisions.

AMERICAN WAY VAN & STORAGE, INC., Dayton

(continued from page 91)

7(a). Exception to Item 450.

1. On the first Monday of each calendar month, the “national U.S. average” price per gallon of diesel fuel will be determined based on the price stated by the U.S. Department of Energy (DOE), Energy Information Administration’s (EIA) survey of “Retail On-Highway Diesel Prices.” This price will be obtained by calling the DOE Fuel Hot Line at 202-586-6966 or via the DOE Internet web site at www.eia.doe.gov.
2. If the first Monday of the calendar month is a Federal holiday, the price will be determined based on the stated DOE price available on the next subsequent business day (Tuesday).
3. The DOE fuel price obtained will then be indexed based on the fuel price/adjustment factor matrix set forth in this section to determine the Fuel Cost Price Adjustment that will become applicable on the fifteenth (15th) day of the same month. The adjustment determined will apply for shipments loaded beginning on the 15th day of the month and remain in effect through the 14th day of the following month starting from the effective date of this section. For example, if the reported price of self-service diesel fuel determined on Monday, June 4th is \$2.201 per gallon, a four (4.0%) percent Fuel Cost Price Adjustment will apply for shipments loaded as of June 15th through July 14th. Then, if the reported price of diesel fuel on Monday, July 2nd increases to \$2.419 per gallon, a five (5.0%) percent Fuel Cost Price Adjustment will apply for shipments loaded as of July 15th through August 14th.
4. Notwithstanding any other provisions of the tariff, the Fuel Cost Adjustment WILL APPLY to the transportation charges applicable on SIT shipments when such shipments are delivered to or removed from the storage-in-transit location during the period that a Fuel Surcharge is in effect.

ITEM 2310

**BERGER OHIO, INC., d/b/a BERGER CINCINNATI, BERGER CLEVELAND
BERGER COLUMBUS, Cincinnati
VALUATION – LIABILITY**

1. **NOTICE TO SHIPPER ABOUT SHIPMENT VALUATION:** The basic liability for loss or damage to an article that is transported or warehoused is 60 cents per pound per article. The charges for transportation and/or warehousing are based upon that liability because carrier does not know the value of the goods. This liability is far less than the average value of household goods. As an example, if your shipment weighs 12,000 pounds, the maximum recovery that you would receive if the entire shipment were lost or totally damaged would be \$7,200.00.
2. **INCREASE THE LIABILITY TO \$3.00 PER POUND PER ARTICLE:** As an alternative to the above, shipper may choose to increase the maximum liability of carrier from \$.60 to \$3.00 per pound per article lost or damaged. If shipper makes this selection, shipper must value their goods the same as for full replacement. Shipper will then be charged at 50% of the charges reflected in the chart. This choice must be entered on the Estimate/Bill of Lading.
3. **INCREASE THE LIABILITY TO THE FULL REPLACEMENT VALUE:** If shipper wants carrier to be liable for the full replacement value of any articles that are lost or damaged, shipper must state in writing on the Estimate/Bill of Lading the replacement value of the entire shipment. Replacement value is the market cost of replacement of any lost or damaged article(s). If shipper fails to state the replacement value then the maximum liability of carrier is 60 cents per pound per article.
4. **EXTRAORDINARY (UNUSUAL) VALUE ARTICLES:** If the shipment contains any item that is of a value in excess of \$100 per pound such an item must be specifically identified and declared. If this is not done then the maximum liability of carrier will be limited to \$100 per pound per article (based on the article's actual weight) not to exceed the declared value of the entire shipment if the full replacement option was chosen, otherwise the limit the carrier will pay is 60 cents per pound per article if no specific value is declared. Identified extraordinary articles will be subject to additional charges.
 - a. Carrier has the option to repair the article or to pay the amount of loss at either 60 cents per pound or replacement depending on shipper selection of valuation.
 - b. If shipper undervalues the shipment, any payment for a loss will be reduced by the percentage amount of the undervalue.

COUNTRY WIDE MOVING & STORAGE, INC., Dayton

(continued from page 103)

7(a). Exception to Item 450.

1. On the first Monday of each calendar month, the “national U.S. average” price per gallon of diesel fuel will be determined based on the price stated by the U.S. Department of Energy (DOE), Energy Information Administration’s (EIA) survey of “Retail On-Highway Diesel Prices.” This price will be obtained by calling the DOE Fuel Hot Line at 202-586-6966 or via the DOE Internet web site at www.eia.doe.gov.
2. If the first Monday of the calendar month is a Federal holiday, the price will be determined based on the stated DOE price available on the next subsequent business day (Tuesday).
3. The DOE fuel price obtained will then be indexed based on the fuel price/adjustment factor matrix set forth in this section to determine the Fuel Cost Price Adjustment that will become applicable on the fifteenth (15th) day of the same month. The adjustment determined will apply for shipments loaded beginning on the 15th day of the month and remain in effect through the 14th day of the following month starting from the effective date of this section. For example, if the reported price of self-service diesel fuel determined on Monday, June 4th is \$2.201 per gallon, a four (4.0%) percent Fuel Cost Price Adjustment will apply for shipments loaded as of June 15th through July 14th. Then, if the reported price of diesel fuel on Monday, July 2nd increases to \$2.419 per gallon, a five (5.0%) percent Fuel Cost Price Adjustment will apply for shipments loaded as of July 15th through August 14th.
4. Notwithstanding any other provisions of the tariff, the Fuel Cost Adjustment WILL APPLY to the transportation charges applicable on SIT shipments when such shipments are delivered to or removed from the storage-in-transit location during the period that a Fuel Surcharge is in effect.

NOTE 1 – To determine Fuel Cost Adjustment amount to apply, multiply the rate times the total transportation miles of the shipment.

NOTE 2 – On the first Monday of each calendar month, the "National U.S. average" price per gallon of diesel fuel will be determined based on the price stated by the U.S. Department of Energy (DOE), Energy Information Administration's (EIA) survey of "Retail On-Highway Diesel Prices". This price will be obtained by calling the DOE Fuel Hot Line at 202-586-6966 or via the DOE internet website at www.eia.doe.gov.

NOTE 3 – If the first Monday of the calendar month is a Federal holiday, the price will be determined based on the stated DOE price available on the next subsequent business day (Tuesday).

NOTE 4 – The DOE fuel price obtained will then be indexed based on the fuel price/adjustment factor matrix set forth in this item to determine the Fuel Cost Price Adjustment that will become applicable on the fifteenth (15th) day of the same month. The adjustment determined will apply for shipments loaded beginning on the 15th day of the month and remain in effect through the 14th day of the subsequent following month starting from the effective date of this item.
