*The Ohio Power Siting Board’s mission is to support sound energy policies that provide for the installation of energy capacity and transmission infrastructure for the benefit of Ohio citizens, promoting the state’s economic interests and protecting the environment and land use.*

# Voting Board Members

**Andre T. Porter**

Chairman

Public Utilities Commission of Ohio

**Craig W. Butler**

Director

Ohio Environmental  
Protection Agency

**David T. Daniels**

Director

Ohio Department of Agriculture

**David Goodman**

Director

Ohio Development Services  
Agency

**Richard Hodges**

Director

Ohio Department of Health

**James J. Zehringer**

Director

Ohio Department of  
Natural Resources

**Jeffrey Lechak**

Public Member

\***Thomas W. Johnson** served on  
the Board January–April 2015

\*\***Asim Z. Haque** appointed  
chairman of the PUCO in May 2016

# Non-voting Legislative Members

**Senator Bill Seitz**

Ohio Senate

**Senator Michael J. Skindell**

Ohio Senate

**Representative Christina Hagan**

Ohio House of Representatives

## About the Ohio Power Siting Board

The Board is comprised of 11 members. The seven voting members are: the chairman of the Public Utilities Commission of Ohio (PUCO); the directors of the Ohio Environmental Protection Agency, the Ohio Development Services Agency, and the Ohio departments of Agriculture, Health and Natural Resources; and a public member. The public member, who must be an engineer, is appointed by the governor from a list of nominees submitted by the Ohio Consumers' Counsel. The four non-voting members are legislators, two from the Ohio House of Representatives and two from the Ohio Senate. The chairman of the PUCO serves as the chairman of the Ohio Power Siting Board (OPSB). The OPSB staff is drawn from the member agencies' staff and coordinates its work with other state and federal agencies with a stake in siting activities.

## Siting major utility facilities in Ohio

Before construction can begin on any major utility facility or economically significant wind farm within the state of Ohio, a certificate of environmental compatibility and public need must be obtained from the OPSB. The Ohio Revised Code defines a major utility facility as an electric generating plant with a capacity of 50 megawatts (MW) or more; an electric transmission line and associated facilities of 125 kilovolts (kV) or more; or a gas pipeline that is greater than 500 feet in length, more than nine inches in outside diameter, and designed for transporting gas at a maximum allowable operating pressure in excess of 125 pounds per square inch. The statute defines economically significant wind farm as wind turbines and associated facilities with a single interconnection to the electric grid and designed for, or capable of, operation at an aggregate capacity of 5 or more MW but less than 50 MW.

Facilities under the OPSB's jurisdiction fall into one of three application categories based upon their size, purpose and operating characteristics: certificate application, letter of notification or construction notice.

Certificate applications, designated by the BGN (generator), BTX (transmission) or BSB (substation) purpose code, are processed by the OPSB using the standard application process. These projects are typically larger facilities and include economically significant wind farms and most other electric generating facilities, as well as most electric transmission lines more than 2 miles in length and most gas pipelines more than 5 miles in length.

Letters of notification (BLN) and construction notices (BNR) are processed by the OPSB using the accelerated application process. These projects are typically smaller in size and are most often electric transmission lines of 2 miles or less and gas pipelines of 5 miles or less.

The standard and accelerated application processes are described in greater detail below.

# Standard application process

## ***Pre-application***

Before filing a certificate application, the applicant may request a pre-application conference. The conference serves as an opportunity for clarification of the OPSB's rules and regulations, identification of potential problems with the project and notification of possible requests for waivers or departures from the OPSB's rules.

## ***Public informational meeting***

Prior to any formal filings, the applicant is required to hold a public informational meeting. This meeting provides an opportunity for public input and concerns to be gathered by the applicant to aid in preparing an application. This meeting, along with public notice, also serves to advise affected parties of the upcoming project.

## ***The application***

After holding the public informational meeting, the application for the proposed facility is filed with the OPSB. The application must describe the anticipated impacts of the facility on the surrounding area. Applications for electric transmission lines and gas pipelines must also include information on two routes and discuss the need for the facility. While one of the routes is designated "preferred" by the applicant, both routes must be viable. The preferred designation does not indicate any favor or prior approval of the Board.

Within 60 days of application receipt, the OPSB notifies the applicant as to whether or not the application complies with the statute sufficiently to continue with review of the application. If it does not, the application is found to be in noncompliance until the deficiencies are corrected. When the application is determined to be in compliance, it is served on local public officials in the area of the project and legal notices are published in local newspapers. Also during this period, interested parties have the opportunity to be recognized as interveners in the case.

## ***Staff report***

The OPSB staff reviews the application and consults with other interested state and federal agencies. A staff report containing the staff's findings and recommendations must be made available 15 days prior to the start of the hearings. This staff report becomes a part of the evidence in each case, but the Board is not bound by the staff's recommendations.

## ***Hearings***

Local public and adjudicatory hearings are held by the OPSB. The hearings enable citizens, interest groups and governmental entities to present testimony. An administrative law judge, who is an attorney, presides over the hearings in the capacity of a judge. A court reporter records all proceedings and testimony. Following the hearings, the Board makes its ruling based on the case record.

## ***Rehearings and appeals***

Once the Board issues its decision, parties have 30 days to file for rehearing of the decision with the Board. Following the completion of the Board's rehearing process, decisions made by the Board may be appealed to the Supreme Court of Ohio.

## Accelerated application process

### ***Letters of notification***

The applicant must publish notice of a letter of notification application in local newspapers within seven days of filing and send a letter describing the proposed facility to each affected property owner and tenant. The applicant must also notify local governments in the project area, provide them with a copy of the application and provide a copy to the local library. Hearings are not required, but requests for intervention and formal comments are accepted within 10 days of the publication of notice in the newspaper. Informal written comments are accepted by the OPSB at any time.

Letter of notification applications are automatically approved no later than 90 days after the filing date of the application, unless suspended. An applicant may request that its application be expedited to 28 days. The OPSB reviews the application and consults with and solicits comments from other interested state and federal agencies. A staff report containing the staff's findings and recommendations is made available at least seven days prior to the automatic approval date. This staff report becomes a part of the evidence in the case, but the Board is not bound by the staff's recommendations.

### ***Construction notices***

Construction notice applications are automatically approved no later than 90 days after the filing date of the application, unless suspended, and may be expedited to 21 days. The applicant must notify local governments in the project area and provide them with a copy of the application. Hearings typically are not required, but written comments are accepted by the OPSB at any time. A staff report containing the staff's findings and recommendations is made available at least seven days prior to the automatic approval date. This staff report becomes a part of the evidence in each case, but the Board is not bound by the staff's recommendations.

# Case code system

Cases filed with the OPSB are identified by a four-element coding system. The coding elements are: the year in which the case was filed, the sequence in the filing, the industry code and the purpose code. The industry code indicates the utility type involved in the case and the purpose code indicates the reason for which the case has been brought before the Board. For example, an electric generating facility developer applying for a certificate would be coded as follows:

15-0000-EL-BGN

year-sequence-industry-purpose

## ***Industry codes***

EL electric

GA gas

## ***Purpose codes***

BGN electric generator application

BGA electric generator amendment

BSB electric substation application

BTX transmission application

BTA transmission amendment

BLN letter of notification

BNR construction notice

BRO rule promulgation

BIN study or investigation

BJF jurisdictional finding

## Staff reports issued

## Expenses and receipts

The Ohio Administrative Code establishes a framework under which the OPSB charges applicants for the costs of conducting investigations and reviewing applications for major utility facilities. The expenses associated with the Board's analysis, processing and monitoring of applications are paid by the applicant in each case.

### ***Standard applications***

At the end of the calendar year in which a certificate is issued, the OPSB conducts a review to determine if the application filing fee was adequate. If the fee was inadequate, the OPSB invoices the applicant for the amount of the shortage, and does so annually thereafter until the project is completed. Final reconciliation, including refunds, is done in the calendar year in which the applicant notifies the OPSB that the project has been completed.

### ***Accelerated applications***

The OPSB expenses for the processing of letters of notification and construction notices are invoiced to the applicant at cost based upon expenses accrued in each case. An applicant requesting expedited processing of a letter of notification or construction notice must pay a fee of \$2,000 due at the time of the filing.

Please refer to the 2015 Expenses and 2015 Receipts sections of this report for a detailed accounting of OPSB expenditures and fees collected.

## 2015 Expenses

Case type	Case number	Project name	Expenses
Generating facility application	99-1626-EL-BGN	Norton Energy Storage	\$(70.66)
Generating facility application	02-3082-EL-BGN	Ashtabula Generation	\$(587.88)
Generating facility application	04-1011-EL-BGA	Lima Energy , Amendment One	\$(48.88)
Electric transmission application	08-0123-EL-BTX	Chamberlin/Shalersville Transmission Line	\$(391.28)
Generating facility application	08-0414-EL-BGN	Ohio Clean Rivers, LLC	\$(2,533.40)
Generating facility application	08-0666-EL-BGN	Buckeye Wind	\$(43.32)
Generating facility application	09-0277-EL-BGN	Hog Creek Wind Farm I	\$(388.38)
Generating facility application	09-1066-EL-BGN	Blue Creek Wind Farm	\$(713.52)
Generating facility application	09-1066-EL-BGN	Blue Creek Wind Farm	\$(713.52)
Generating facility application	10-0369-EL-BGN	Paulding Wind Farm II	\$(264.39)
Electric Substation application	11-1313-EL-BSB	Vassell Substation	\$(568.67)
Generating facility application	11-2400-EL-BGN	Ashtabula Wind Energy	\$(30.94)
Electric transmission application	11-4505-EL-BTX	Elk 138 kV Transmission Line	\$(5,937.04)
Electric transmission application	11-4884-EL-BTX	East-Springfield London-Tangy 138 kV Transmission Line	\$(3,229.67)
Generating facility application	11-4886-EL-BGN	Honey Creek Wind	\$(98.58)
Generating facility application	12-0160-EL-BGN	Buckeye II Wind Farm	\$(1,617.46)
Accelerated construction notice	12-1052-EL-BNR	Corridor Substation	\$(99.12)
Accelerated letter of notification	12-1726-EL-BLN	Bruce Mansfield-Glemwillow 345 kV Transmission Line	\$(439.45)
Accelerated construction notice	12-2167-EL-BNR	Poston-Ross 138 kV Transmission Line Rebuild/Reconductor #4	\$(276.75)
Accelerated letter of notification	12-2216-EL-BLN	Marysville Substation	\$(232.07)
Accelerated letter of notification	12-2222-EL-BLN	Hyatt-Corridor 345 kV Transmission Line Structure Replacement	\$(41.65)
Accelerated construction notice	12-2446-EL-BNR	Poston-Ross 138 kV Transmission Line Reconductor/Rebuild #5	\$(276.75)
Accelerated construction notice	12-2480-EL-BNR	Poston-Ross 138 kV Transmission Line Reconductor/Rebuild #6	\$(207.55)
Accelerated construction notice	12-2481-EL-BNR	West Lancaster-Bixby 138 kV Transmission Line	\$(41.65)
Accelerated letter of notification	12-2519-EL-BLN	Kirk-Jug 138 kV Transmission Line Circuit	\$(41.65)
Accelerated construction notice	12-3227-EL-BNR	Canton Central Substation Expansion	\$(174.05)
Accelerated letter of notification	13-0013-EL-BLN	Ohio Central Substation	\$(333.22)
Accelerated construction notice	13-0027-EL-BNR	Meldahl Dam Transmission Line Tap	\$(41.65)
Accelerated letter of notification	13-0170-EL-BLN	Wagenhals-West Canton Transmission Line Improvement	\$(1,099.17)
Accelerated letter of notification	13-0171-EL-BLN	Trent-Delaware 138 kV Transmission Line	\$(41.65)

Case type	Case number	Project name	Expenses
Accelerated letter of notification	13-0224-EL-BLN	Dowling Substation	\$(84.64)
Accelerated letter of notification	13-0452-EL-BLN	Steamtown 138 kV Transmission Line Loop	\$(41.65)
Accelerated construction notice	13-0554-EL-BNR	Poston-Elliott 138 kV Transmission Line Section One	\$(41.65)
Accelerated construction notice	13-0669-EL-BNR	Wagenhals-West Canton 138 kV Transmission Line	\$(41.65)
Accelerated letter of notification	13-0698-EL-BLN	South Canton-West Canton 138 kV Transmission Line Improvement - Phase One	\$(41.65)
Accelerated letter of notification	13-0757-EL-BLN	South Canton-West Canton Transmission Line Improvement	\$(41.65)
Accelerated construction notice	13-1011-EL-BNR	West Bellaire-Brues 138 kV Transmission Line	\$(43.89)
Accelerated letter of notification	13-1575-GA-BLN	PIR-166, Ottawa Road	\$(58.02)
Accelerated construction notice	13-1667-EL-BNR	Underground OHH-Sugacreek 138 kV Transmission Line Reconductoring	\$(233.92)
Accelerated letter of notification	13-1800-EL-BLN	Allen Junction-Lemoyne #2 345 kV Transmission Line	\$(169.29)
Accelerated letter of notification	13-1921-EL-BLN	Summerside 138 kV Transmission Line	\$(277.82)
Accelerated letter of notification	13-2009-EL-BLN	Melmore-Tiffin Center Transmission Line Improvement	\$(43.89)
Accelerated letter of notification	13-2036-EL-BLN	Ohio Central 345 kV Transmission Line Extension	\$(291.57)
Accelerated letter of notification	13-2121-EL-BLN	Hayden-Hyatt Transmission Line Second Circuit	\$(208.33)
Accelerated letter of notification	13-2412-EL-BLN	Gavin 138 kV Transmission Line Extension No. 2 Relocation	\$(43.89)
Accelerated construction notice	13-2425-GA-BNR	Carroll County Energy Gas Pipeline	\$(445.95)
Accelerated construction notice	14-0024-EL-BNR	Kammer-West Bellaire 345 kV Transmission Line Circuit	\$(43.89)
